

# Week Report 5

---

## Practice 1

A terminal window titled "Tilix: reaper@cis106: ~" showing a series of commands to create and then delete a directory structure. The commands are: `mkdir website`, `cd website/`, `mkdir assets script`, `touch index.html`, `touch assets/image.png`, `touch script/script.js`, and `tree .`. The `tree` command output shows a directory structure with `assets` (containing `image.png`), `index.html`, and `script` (containing `script.js`). After displaying the tree, it says "2 directories, 3 files". Then, the user attempts to delete files and directories with `rm script/script.js assets/image.png`, `rmdir scripts/ assets/`, and `rmdir script/ assets/`, all of which fail with the message "No such file or directory". Finally, the user runs `cd ..` and `rm -r website/` to successfully remove the directory. A cartoon character of a small brown creature with large eyes sitting on a grey disc is visible on the right side of the terminal window.
